ITEM NUMBER 12.1

TITLE Audit Management Letter Update

REFERENCE 1060891

AUTHOR Dave HERON, Finance Manager

RoperGulf REGIONAL COUNCIL SUSTAINABLE - VIABLE - VIBRANT

RECOMMENDATION

That the Audit Committee notes the Audit Management Letter Update and requests that the progress of the recommendations is reported at the next Audit Committee meeting.

BACKGROUND

The auditor, Deloitte provided a draft management letter itemizing issues that they consider weaknesses in the financial management environment and processes of council that were identified during the conduct of the audit for the year ended 30 June 2020. The update to the points raised in that letter is attached.

ISSUES/OPTIONS/SWOT

Most of the issues have already been addressed and enacted. Those matters still outstanding at the last Audit Committee Meeting are updated accordingly:

•	Project Gateway Planning Process to address project budgeting	Completed
•	Grants Module in Tech 1 to establish a better Grants Register	June 2021
•	Financial Calendar to allocate tasks to responsible officers	Completed
•	Allocation of internal costs review for programs to be completed	Ongoing

FINANCIAL CONSIDERATIONS

ATTACHMENTS

- 1. Audit Management Update.docx
- 2 Project Gateway Report.pdf
- 35 Example Financial Reporting Calendar.pdf

1. Audit findings for the year ending 30 June 2020

Observation

We noted that during the year, the management identified a case of misrepresentation by an employee. It was found that an employee who provided incorrect information related to his qualifications was hired. It was subsequently found out through a tip-off and the employee was sacked during the probation period. We noted based on the discussion with the management that the employee was not in-charge of key assets or handling money.

Recommendation

It is recommended that management considers ways to enhance the robustness of the background checks to ensure that any false information is identified in a timely manner.

Management's comments

This is lesson learned by experience and the recruitment process now includes a specific instruction to sight and verify qualifications presented by applicants

Update

A additional step in the recruitment process is to conduct due diligence and physically sight credentials that are deemed critical to the role

During our review of the budgets related to capital grants we noted that there is insufficient budgeting and feasibility process carried out prior to applying for the capital grant. This has resulted in delays in implementing capital plans due to inaccurate budgeting and lack of required approval to carry out the capital program.

Lack of realistic budgets also inhibits the council's ability to track the performance of significant grants.

It is recommended that the budgeting process for capital grants should be enhanced to ensure a proper feasibility and costing has been carried out to ensure the project performance is tracked appropriately and in a timely manner. It will also ensure that capital projects are initiated and completed in a timely manner.

A project planning process is being implemented to include gateways that must be achieved before proceeding further. One of these gateways is the proper development of project feasibility costings before proceeding to council's approval and funding applications.

A Gated Process has been instigated and a Project Steering Committee established to ensure the proper processes are followed with appropriate authorities given during the lifecycle of a project.

The Gates are title

- 1. Strategic Assessment
- 2. Preliminary Evaluation
- 3. Business Case
- 4. Readiness for Service

A sample report for updating the Council on project progress is attached

Observation	Recommendation	Management's comments	Update
While performing walk through with the acting management accountant, it was identified that there is no verification/approval in place for the changes to bank details of the existing supplier upon request by the supplier.	It is recommended that management implements verification/approval processes in place for changes made to the supplier details.	An approval process is now in place where the Finance Officer seeks signed approval before changing any bank account details. Unfortunately this is not a secure workflow option available in Tech 1.	This process is now fully operational where approval is sought from the Finance Manager or Management Accountant before bank account details are changed
It was noted that a large value Telstra Finance Lease was entered into without approval from the relevant ministerial position. Secondly the agreement was signed by the delegate who were not authorised to approve the transaction without informing the current CEO on	It is recommended that stricter controls are implemented to avoid similar incidents in future and ensure awareness to the team of the required approval process. Potential automation of the process may also help in reducing this risk.	Automated controls will be installed once the Project Gateway process is instigated. This may be by using the Tech 1 Works Module or by using another specialist project planning software. This is being led by the CEO.	This recommendation is addressed in the creation of the Project Steering Group which will make the necessary decisions based on full disclosure of information.
the matter. Once the matter was noted, it was brought to the attention of Department of local government, council members and the audit committee. The council undertook the process to rectify the transaction with Telstra to change the agreement from a lease agreement to an outright purchase agreement. The risk register was updated to include a risk related to such approvals and policies updated to avoid similar instances.		This particular incident involved personnel that are no longer with the council. Since then the financial delegation manual and procurement process has been reinforced to all managers.	

It was identified that grants details including funding, refund, obligations etc. are managed manually in an excel sheet and the Magiq file management system. The Grant register has limited details about the nature, timing of grants, milestones and performance reporting.

It is recommended that the grants register include more details about the grant performance obligations and milestone payments to help with the oversight and management of grant reporting.

We recommend that a financial

of financial reporting activities is

communicated to the team. It will

implemented to ensure that the list

reporting work program be

known, and a timeline be

also assist in ensuring the

accountability of the people

financial reporting activities.

responsible for performing the

This has been identified as an internal control weakness as well. Councilbiz advised March 2020 that the relevant grants module in Tech 1 would not be compatible for this use. However after recent discussions and similar requests from other councils, this position has changed and configuration of the Grants/Contract Module is Tech 1 is proceeding.

This will automate several processes and have all the relevant information available to all users.

A financial calendar is being prepared to allocate a process to a council officer and a due date when this is due be it weekly, monthly, quarterly, etc

The specific example sighted occurred when finance staff left without providing any handover which resulted in a period where regularly reconciliations for some accounts were not performed.

These tasks are now being done regularly by suitably trained accountants.

Delays have been encountered for various reasons but an initial configuration meeting was held on 25 February 2021 with the Grants Coordinator and A/GM Corporate Services and Councilbiz.

It is envisaged that the module will be operation from 1 July 2021.

During our audit, we noted several deficiencies in the financial reporting process e.g. delay in preparation of reconciliations, multiple versions the schedules and error in the key schedules, not all the required schedules being prepared in the timely manner.

te a process to a a due date when ekkly, monthly, Team which is to be done at a specified time each week/month/quarter

A complete calendar detailing processing responsibility of financial data has been developed.

Attachment 1

Observation	Recommendation	Management's comments	Update
Per review of the Cash and Term Deposit Astrophyse of it was noted that there are signatories who no longer work for the Council. It was also noted that some of the Signatories for Term Deposits had not been updated so the cash could not be transferred to Roper Gulf once the term deposit matured in a timely manner. Current recorded signatories: Gregory Arnott (Resigned) Mark Gardner David Heron Phillip Luck Steven Sanderson (Resigned) Sharon Hillen (Resigned) Jasjit Rai (Resigned)	It is recommended that Roper update the record of their signatories in a timely manner as and when there is a change in the Council's personnel with signing authority.	The authorised signatories had not been amended for some time. As most of the Term Deposits were managed by the investment broker, Curve Securities, it was not noticed. These have now been reviewed and changed with council's investment broker and deposit recipients. Regular reviews will be scheduled. Note that Steve Sanderson is still employed.	The bank signatories have been amen Medit Management Update.docx The need to amend these signatories as required has been advised to the Finance team who will be aware of the need as any changes to senior staff occur
Per review of the journal process it was noted accountants can post journals in grants without review or approval if it doesn't involve a third party.	It is recommended that all journals posted in the system have a separate preparer and reviewer.	This is true for the early part of 2019/20. The process was changed towards the end of 2019 is now that the Finance Manager approves all General Journals of any value. A further process will be instigated where the Management Accountant will review and authorise any journals prepared by the Finance Manager.	General Journal entries are being reviewed by the Finance Manager or Management Accountant
Observation	Recommendation	Management's comments	Update
While performing substantive testing, it was noted that RGRC do not maintain	The Council could emphasize the importance of obtaining delivery	This process is impractical for the council's payment system. The	Not instigated. Unfeasible with resources available

Adherence to established policies often freighted through several

reliance is on the relevant manager

expense have been availed.

confirmation to establish that the

the delivery docket or any sort of

confirmation confirming that goods or

services are received. RGRC just have a

pAttachmantager approving the invoice

under software Magig which does not

Observation	Recommendation	Management's comments	Update
While performing the reconciliation of the Property, Plant and Equipment balance to general ledger it was observed that Capital WIP is not classified separately instead it is clubbed with the fixed asset group.	It is recommended that RGRC maintains a separate CWIP account to track the CWIPs correctly and also to track the cost-to-complete for a complete and accurate records for CWIP.	Each asset class has its own account (51##) and its own WIP account (53##) that are reconciled on a monthly basis	Capital WIP is reconciled each month by the Management Accountant and completed projects are commissioned into the Asset Management system by the Financial Accountant
It was noted during the interim audit that the Property, Plant and Equipment register was not updated and reconciled at each month end. Due to this Roper had to reconcile the entire years Property, Plant and Equipment movement during the final audit procedures.	It is recommended that the council incorporates the Fixed Asset reconciliation process in their monthend reporting procedures so that the fixed assets register is updated and reconciled on monthly basis and any exception can be dealt with in a timely manner.	The Plant, Property & Equipment Register had not been reconciled since the departure of the Finance Manager in November 2019. No handover had been conducted to any of the remaining staff. It was May 2020 by the time the new Financial Accountant was able to reconcile the register up to date. The register is now updated for new additions and disposals on a monthly basis	This reconciliation is performed monthly by the Financial Accountant

Observation

During the review of the grant acquittals, we noted that certain expenses have been allocated to particular grants based on the approved budgets. The Council does not maintain the supporting documents for the actual expenses incurred. These expenses could only be supported by an approved budget for each grant. In the absence of supporting documents related to allocated expenses the correctness of the amount could not be verified.

Recommendation

We recommend that the Council should improve the documentation related to allocated expenses to the grants to ensure that the correct expenses have been allocated to the grants and there are adequate documents to trace the expense allocation.

Management's comments

The internal allocations are not materially inaccurate but many have not been reviewed and updated for many years. The Finance Manager and Management Accountant began a processes of reviewing, correcting and documenting the internal allocations from July 2020. This review has included analysing the rationale behind each charge and eliminating allocations that are deemed unnecessary.

Update

The review of internal cost allocation is a continual process throughout the year and has been undertaken by the Management Accountant.

Errors and issues have been revealed and corrected.

GENERAL BUSINESS

ITEM NUMBER 12.2

TITLE Business Continuity Plan

REFERENCE 1060899

AUTHOR Dave HERON, Finance Manager

RECOMMENDATION

That the Audit Committee endorse the draft Business Continuity Plan.

BACKGROUND

The Covid-19 outbreak early in 2020 exposed every organisation to an extraordinary event that challenged Council's response to the crisis and highlighted many critical issues that had not been previously considered. As part of council's response and ongoing attention to risk management, a Business Continuity Committee was established to manage the crisis and to create a Business Continuity Plan that can be referred to for future crisis events.

ISSUES/OPTIONS/SWOT

The feedback from the last Audit Committee has been passed to the Business Continuity Committee. But that Committee has not met since due to unavailability of required staff. It is intended that the Committee meet by the end of March to discuss and develop scenarios to test the Plan.

GENERAL BUSINESS

ITEM NUMBER 12.3

TITLE Gated Project Process

REFERENCE 1060928

AUTHOR Dave HERON, Acting General Manager Corporate Services &

Sustainability

RECOMMENDATION

That the Audit Committee support the use of the Gated Project Process

BACKGROUND

A control weakness that has been identified by the Auditors and current council management has been the projects management process. From inception to closure the lifecycle of a project was disjointed with little or no documented reason for it, and then a haphazard approach to its delivery. This lack of control resulted in less than a third of annually budgeted capital projects being delivered and had a range of other risks.

In response to these failings, management sought the assistance of Byrne Consultants, who are experienced Project Managers, to develop a gateway system by which each project gets assessed and managed through a series of gates. The process has just begun and teething problems are expected, but overall, management and the Projects team are happy with the outcome.

Attached are the Standard Operating Procedures (SOP) and basic templates for the progress through the gates. The current list of projects has been assessed to its current stage so the next stage and new projects are required to meet the conditions of each relevant gate.

ISSUES/OPTIONS/SWOT

The system has been introduced to reduce the risks of Project Management, some of which has been a feature of previous processes.

- Projects being delivered not in line with Councils Strategic Goals. This can result in projects being instigated without Council's knowledge and approval.
- Projects not being properly scoped and budgeted. This can result in budget variations needed to cover over expenditure.
- Grants being sought and received without a proper scope of works and achievable delivery date. This may result in projects not being completed in time and grants needing to be returned to the funding body.
- An appropriate level of communication to stakeholders. This ensures that Local Authorities, community members and government agencies are included in any proposed projects.

The process is still being refined, specifically

- The establishment of a Project Steering Group (PSG) that would review and discuss the relevant documents, and approve the progress of a project to the next gate.
- The format of the governance of the PSG guiding things on how projects are proposed, Project Holders interaction with the group, and the reporting mechanisms back to Council.

FINANCIAL CONSIDERATIONS

The cost of the consultancy was included in the annual budget for assets and projects.

1. STANDARD OPERATING PROCEDURE CERTIFICATION

Procedure Title:	Capital Works Governance
SOP Number:	TBA
Classification:	TBA
Business Unit:	TBA
Date:	29 February 2021
Status:	Revision D

2. INTRODUCTION / SCOPE

This procedure sets out Roper Gulf Regional Council's framework to efficiently and effectively manage and control capital works projects. It prescribes the processes for managing capital works projects to achieve:

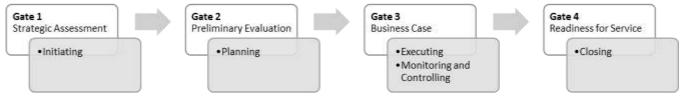

- Efficient use of Council's resources.
- · Delivery of Council's strategic objectives.
- Prioritisation of capital works projects based upon Council's needs.

3. THE PROCEDURE

The capital works project lifecycle is typically delivered through five process groups including:

- Initiating The project is created and approved to proceed.
- Planning The project scope, schedule and budget are defined.
- Executing The project works are delivered.
- Monitoring and controlling The project progress is monitored and risks are mitigated.
- Closing The project is finalised and assets are transitioned to operations and maintenance.

A gateway approach is used throughout a capital works project's lifecycle to ensure that it is well positioned to enter the next process. Approval is given to proceed to the next process only when key deliverables are completed.

The table below summarises the Gate approach including the Gate name, description, position in project lifecycle, key deliverables and key tasks.

Gate 1	Gate 2	Gate 3	Gate 4
Strategic Assessment	Preliminary Evaluation	Business Case	Readiness for Service
	_	ription	
A review based upon inhouse studies to assess the overall feasibility of the project and recommend whether the project should proceed to concept design.	A review based upon concept design to assess the feasibility of the project with a focus on the scope and cost and recommend whether the project should proceed to detailed design.	A review based upon detailed design to assess the feasibility of the project with a focus on delivery and procurement and recommend whether the project should proceed to construction.	A review based upon substantial construction completion to assess and recommend strategies for construction close out and transition to service.

phase

The documentation for each Gate must be robust, well developed and accurate to ensure that all risks, opportunities and constraints are considered. The aim is to reduce the level of uncertainty of the project scope, budget and schedule to an acceptable level.

The delivery of capital works projects requires the management of a range of issues across a number of considerations such as feasibility, engineering, architecture, environmental constraints, town planning and product suitability. The project development process is required to address the technical issues and also commercial, economic and social issues.

The gateway approach provides the Council with the greatest ability to influence the outcome of capital works projects. The ability to define and shape a project early in the project lifecycle will generate efficiencies. The gateway approach provides key benefits of:

- Alignment of projects to Council's corporate documents.
- Reduced cost overruns.
- Realistic estimates and understanding of scope, budget and schedule.
- Efficient use of resources.
- Projects that are ready to progress to the next phase.

4. AUTHORISATIONS AND APPROVALS

A project steering group will be made up of Council staff and are selected for their relevant experience and expertise in relation to the capital works project. The project steering group will work cooperatively and collaboratively to review, amend as required and approve the Gate forms for the capital works project. The Gate approval by the project steering group does not remove the need to achieve organisational approvals for the capital project such as financial and procurement.

5. CHANGE MANAGEMENT

Capital works projects will undergo a minimum of four Gate approvals during its lifecycle. Gate approvals may be repeated for a capital works project. This is on the basis that projects often encounter significant constraints, risks and uncertainty which may result in a change from the project's approved scope, cost and time requirements. A revised Gate approval must be sought prior to any project changes, if the changes are inconsistent with the most recent Gate approval.

6. FORMS

The relevant forms include:

- Strategic Assessment
- · Preliminary Evaluation
- Business Case
- Readiness for Service

1. PROJECT DETAILS

Project Name:	
Project ID:	
Project Lead:	

2. INTRODUCTION

This Strategic Assessment form is a review based upon in-house studies to assess the overall feasibility of the project and recommend whether the project should proceed to concept design.

3. PROJECT ASSESSMENT

3.1 Overview

Purpose

[Describe the purpose of the project and describe what is to be delivered.]

Background

[Describe the information on the history of the project including approvals and works to date, such as in-house studies.]

3.2 Justification

Needs Analysis

[Describe the problem that the project will solve and assess whether this will be a satisfactory solution. Consider data analysis (such as population statistics, road usage statistics, road safety statistics, assets per community, assets per resident, asset utilisiation, maintenance/operations costs, capital costs), survey (such as public questionnaire, interview of key stakeholders, internal workshop/focus group, interview of technical specialist), literature review (such as reports from other jurisdictions) and direct observation (such as asset audits and inspections).]

Strategic Justification

[Describe how the project purpose and need can be linked to a specific item within Council corporate documentation such as the strategic plan.]

3.3 Relationships

Related Projects

[Describe related projects from Council and other organisations. Outline the impact and what tasks need to be considered to coordinate projects.]

Key Stakeholders and Expectations

[Describe key stakeholders and outline expectations and sensitivities that need to be considered.]

Governance

[Describe whether the project will trigger specific governance arrangements with other organisations and whether there will be additional responsibilities for Council. Consider the requirements for working groups and reporting to other organisations.]

3.4 Risks, Opportunities and Constraints

Risks

[Describe the key risks that could result from the project. Consider community expectations, stakeholders, environment, safety, security, scope, design, construction, cost, schedule, legal, weather, site conditions, labour, resources, handover, operations and maintenance.]

Opportunities

[Describe the key opportunities that could result from the project. Consider efficiencies that could be achieved.]

Whole of Life Assessment

[Describe the strategy for ownership, operations maintenance of the new assets. List what new/additional resources, capital and operational/maintenance funds, contracts and approvals will be required for the through life support of the asset.]

Regulatory Approvals

[Describe the regulatory approvals that will be required, such as planning approvals (development permit, subdivision permit, building permit), AAPA Authority Certificate, environmental approvals, service authority approvals.]

Long Lead Items and Tasks

[Describe long lead items that will be required, such as specialist equipment, materials and seasonal impacts on access. Describe long lead tasks, such as land tenure.]

3.5 Planning and Delivery

Scope - Options

[Describe the proposed scope of works. Consider whether there are a range of options that could be considered, it is preferred that few options could be reviewed in the next process. If

there is a preferred option, justify the selection of a preferred option.]

Magnitude of Cost

[Describe the anticipated magnitude of cost for the project design, capital works and operations/maintenance. Consider direct costs such as design, construction, maintenance; indirect costs such as travel, accommodation, contingency and risks. Consider recent projects as a reference, there may be limited information to estimate costs at this point in time.]

Magnitude of Time

[Describe the anticipated magnitude of time for the project design, capital works and transition to operations/maintenance. Consider recent projects as a reference.]

Delivery Strategy

[Describe the proposed strategy for resourcing and procurement of the project design, capital works and operations/maintenance.]

3.6 Resourcing

Funding Sources

[Describe the likely funding sources for the project.]

Budget and Resources

[Describe the budget and resources required for the next process which includes concept design.]

3.7 Recommendation

[Describe whether the project is recommended to proceed to the next process which includes concept design.]

4. PROJECT APPROVAL

[SIGNATURE BLOCKS COULD BE INCLUDED HERE OR THE FORM CAN BE COVERED WITH A MINUTE SEEKING APPROVAL.]

2. INTRODUCTION

This preliminary evaluation form is a review based upon concept design to assess the feasibility of the project with a focus on the scope and cost and recommend whether the project should proceed to detailed design.

3. PROJECT ASSESSMENT

3.1 Overview

Purpose

[Describe the purpose of the project and describe what is to be delivered. Consider the outcome of consultation and the concept design.]

Background

[Describe the information on the history of the project including approvals and works to date, such as concept design. Consider the outcome of consultation and the concept design.]

3.2 Justification

Needs Analysis

[Describe the problem that the project will solve and assess whether this will be a satisfactory solution. Consider data analysis (such as population statistics, road usage statistics, road safety statistics, assets per community, assets per resident, asset utilisiation, maintenance/operations costs, capital costs), survey (such as public questionnaire, interview of key stakeholders, internal workshop/focus group, interview of technical specialist), literature review (such as reports from other jurisdictions) and direct observation (such as asset audits and inspections).]

Strategic Justification

[Describe how the project purpose and need can be linked to a specific item within Council corporate documentation such as the strategic plan. Consider the outcome of consultation and the concept design.]

3.3 Relationships

Related Projects

[Describe related projects from Council and other organisations. Outline the impact and what tasks need to be considered to coordinate projects. Consider the outcome of consultation and the concept design.]

Consultation Strategy

[Describe stakeholders, consultation strategies (objectives, forums, key messages) and controls (risks, sensitivities, record keeping, approvals and reporting). Consider the outcome of consultation and the concept design.]

Governance

[Describe whether the project will trigger specific governance arrangements with other organisations and whether there will be additional responsibilities for Council. Consider the requirements for working groups and reporting to other organisations. Consider the outcome of consultation and the concept design.]

3.4 Risks, Opportunities and Constraints

Risks

[Describe the key risks that could result from the project, consider community expectations, stakeholders, environment, safety, security, scope, design, construction, cost, schedule, legal, weather, site conditions, labour, resources, handover, operations and maintenance. Consider the outcome of consultation and the concept design.]

Opportunities

[Describe the key opportunities that could result from the project, consider efficiencies that could be achieved. Consider the outcome of consultation and the concept design.]

Whole of Life Assessment

[Describe the strategy for ownership, operations and maintenance of the new assets. List what new/additional resources, capital and operational/maintenance funds, contracts and approvals will be required for the through life support of the asset. Consider the outcome of consultation and the concept design.]

Regulatory Approvals

[Describe the regulatory approvals that will be required, such as planning approvals (development permit, subdivision permit, building permit), AAPA Authority Certificate, environmental approvals, service authority approvals. Consider the outcome of consultation and the concept design.]

Long Lead Items and Tasks

[Describe long lead items that will be required, such as specialist equipment, materials and seasonal impacts on access. Describe long lead tasks, such as land tenure. Consider the outcome of consultation and the concept design.]

3.5 Planning and Delivery

Scope

[Describe the proposed scope of works, this may be for one or several concept design options. The project development report (design report) for the concept designs should summarise the key design elements.]

Cost Estimate

[Describe the cost estimate for the project design, capital works and operations/maintenance. The project development report (design report) for the concept designs should include preliminary quantities and cost estimates for each option. Consider direct costs such as design, construction, maintenance; indirect costs such as travel, accommodation, contingency and risks.]

Schedule

[Describe the estimated schedule for the project design, capital works and transition to operations/maintenance. The project development report (design report) for the concept designs should include an estimated works schedule.]

Options Assessment

[Describe options that have been considered for the project and justify the preferred option. The project development report (design report) for the concept design should include an options assessment.]

Delivery Strategy

[Describe the proposed strategy for resourcing and procurement of the project detailed design, capital works and operations/maintenance.]

3.6 Resourcing

Funding Sources

[Describe the likely funding sources for the project. Consider the outcome of consultation and the concept design.]

Budget and Resources

[Describe the budget and resources required for the next process which includes detailed design. Consider the outcome of consultation and the concept design.]

3.7 Recommendation

[Describe whether the project is recommended to proceed to the next process which includes detailed design.]

4. PROJECT APPROVAL

[SIGNATURE BLOCKS COULD BE INCLUDED HERE OR THE FORM CAN BE COVERED WITH A MINUTE SEEKING APPROVAL.]

Long Lead Items and Tasks

[Describe the status of long lead items that will be required, such as specialist equipment, materials and seasonal impacts on access. Describe the status of long lead tasks, such as land tenure. Consider the outcome of consultation and the detailed design.]

3.5 Planning and Delivery

Scope

[Describe the proposed scope of works for the preferred option. The design basis report for the detailed design should summarise the key design elements.]

Cost Estimate

[Describe the cost estimate for the project capital works and operations/maintenance. The design basis report for the detailed design should include quantities and cost estimates. Consider direct costs such as design, construction, maintenance; indirect costs such as travel, accommodation, contingency and risks.]

Schedule

[Describe the estimated schedule for the project design, capital works and transition to operations/maintenance. The design basis report for the detailed design should include an estimated works schedule.]

Delivery Strategy

[Describe the proposed strategy for resourcing and procurement of the project detailed design, capital works and operations/maintenance.]

3.6 Resourcing

Funding Sources

[Describe the proposed funding sources for the project. Consider the outcome of consultation and the detailed design.]

Budget and Resources

[Describe the budget and resources required for the next process which includes construction works. Consider the outcome of consultation and the detailed design.]

[Describe the status of regulatory approvals that will be required, such as planning approvals (development permit, subdivision permit, building permit), AAPA Authority Certificate, environmental approvals, service authority approvals. Consider the outcome of consultation and construction works.]

Long Lead Items and Tasks

[Describe the status of long lead items that will be required, such as specialist equipment, materials and seasonal impacts on access. Describe the status of long lead tasks, such as

land tenure. Consider the outcome of consultation and construction works.]

3.5 Transition to Service

Construction Contract Close Out Strategy

[Describe the strategy to close out the construction contract. Consider completion of deliverables/scope, documentation (such warranties, manuals, as-constructed drawings, certification), finalisation of variations, final payment and defect liability period.]

Hand Over Take Over Strategy

[Describe the strategy for hand over of assets. Consider service authorities (such as drawings, certification, manuals, warranties, reports), maintenance staff (such as manuals, warranties, drawings) and other organisations that may be accepting assets (such as permits, tenure arrangements).]

Operational Resource and Procurement Strategies

[Describe the strategies for resourcing and procurement of operations/maintenance. Consider new resources, new contracts and changes to the management of existing resources and contracts.]

3.6 Resourcing

Funding Sources

[Describe the proposed funding sources for operations and maintenance.]

Budget and Resources

[Describe the budget and resources required for the next process which operations and maintenance.]

3.7 Recommendation

[Describe whether the project is recommended to proceed to the next process which includes operations and maintenance.]

4. PROJECT APPROVAL

[SIGNATURE BLOCKS COULD BE INCLUDED HERE OR THE FORM CAN BE COVERED WITH A MINUTE SEEKING APPROVAL.]

CORPORATE SERVICES AND SUSTAINABILITY DIVISIONAL REPORT

ITEM NUMBER 15.1

TITLE Corporate Information System update

REFERENCE 1061018

AUTHOR Cristian COMAN, Manager Corporate Information

RECOMMENDATION

That the Audit Committee receives and notes this report pertaining to the Corporate Information System overhaul.

BACKGROUND

At the previous Audit Committee Meeting the Manager Corporate Information informed the Committee that the overhaul process had all but ceased due to the exhaustion of available storage space.

The Manager Corporate Information further informed the Audit Committee that additional networked storage was being sourced and solutions were being drafted.

ISSUES/OPTIONS/SWOT

As of mid-February 2020 additional network storage has been sourced and installed as a networked drive, with non-critical, large-sized files being migrated onto the new drive.

Further clean-up of duplicate and triplicate data has been undertaken, and is still underway, with an additional 120GB of storage being freed.

The Community Development Programme (CDP) business unit has partially transitioned to the new-pattern system, and the Assets business unit is currently underway.

Full-transition to the new pattern BCS for all Katherine-based staff is anticipated by end of financial year.
